CASE# 2018-00027161

**CASE REPORT****NARRATIVE****18-27161****07/23/2018****Ofc J. Trombley #345**

On 7/23/2018 at 1045 hours I responded to Fairfax Hospital at 10200 NE 132nd St on report of an assault by a patient against an employee that occurred around 0830 hours this morning. Dispatch reported that the suspect and victim are separated and safe.

I arrived and contacted [REDACTED] *Non-Disclosure*, the victim. He told me that he has been working at Fairfax hospital for three months as a program specialist. He normally works nights, but today was helping out during the day. He observed [REDACTED] and another patient arguing and thought it may get physical so he separated them, getting between them. At first it seemed to work, but [REDACTED] began arguing and [REDACTED] turned towards him. [REDACTED] started swinging punches at [REDACTED] head. [REDACTED] said that he ducked and wrapped his arms around [REDACTED] upper legs, as he had been trained to do. [REDACTED] punched [REDACTED] in the back of the neck three or four times and then stopped. [REDACTED] said that he believed other employees would come to his aid, but no one did. [REDACTED] asked [REDACTED] to let go and he did. [REDACTED] was separated from the area.

Nearly two hours after the assault [REDACTED] had a stiff neck, but had no visible injuries.

[REDACTED] provided a written statement of what occurred saying that he will assist in prosecution against [REDACTED]

[REDACTED] was at Fairfax on a court order, I decided to leave him there for treatment and I would file the charges through investigation.

I completed a criminal citation for [REDACTED] and a PC Affidavit for Assault 4th Degree through investigation.
